### Delvcam - Feature Rich at an Affordable Price!

The Delvcam DELV-DSLR-7L is a camera-top DSLR 7" LCD portable HDMI monitor packed with features typically found in monitors three times the price such as one-touch front panel image control functions and power options via 12VDC or camcorder battery.

A unique feature of the DELV-DSLR-7L is a front panel 5DII function for DSLR ratio adjustment. This allows scaling video that does not fit completely on the monitor screen when connected via HDMI in Record Mode on selected Canon DSLR cameras.

Equipped with pixel-to-pixel mode, the monitor displays images in their native resolution by avoiding the internal scaling function. With aspect ratio settings, you can precisely monitor different aspect ratios in Full Screen, 16:9, and 4:3 modes.

### Specifications

Special Functions: Canon DSLR Ratio Adjustment, Freeze Input, Image Flip, Underscan

Image Control: Histogram, Exposure, False Color, Peaking, Pixel to Pixel, User adjustable markers

Input: HDMI

Output: HDMI

Battery Plate: F970
