**Delvcam - Feature Rich at an Affordable Price!**

The Delvcam DELV-HDSD-10, an LED HD broadcast monitor with dual HDMI inputs, and component video, is optimized for studio and video editing work. The 9.7" LCD is ideal for a small broadcast desktop monitor but large enough to pick out the finest details.

The 1:1 pixel mapping allows you to maintain the original resolution of your camera's output and to avoid unexpected focus issues in post-production. The HDSD-10 offers customizable peaking, false color, histogram, and exposure auxiliary function buttons.

The DELV-HDSD-10 features an HDMI-output for duplicating video content onto a second monitor - no annoying HDMI splitters required. Composite and component through BNC connectors and two HDMI inputs cover all the bases for common broadcast applications.

**Specifications**

|                    |  |                              |
